

Highway Performance Monitoring System

Field Manual

December 2000

**U.S. Department of Transportation
Federal Highway Administration**

Table of Contents

	Page
Chapters	
I Introduction.....	I-1
Background	I-1
Contents of the HPMS Field Manual	I-1
Uses of HPMS Data	I-1
Scope of the HPMS	I-3
Overview of HPMS Reporting Requirements	I-3
II Definitions	II-1
III Summary Data Requirements	III-1
Introduction	III-1
Travel and Demographic Data.....	III-1
Pavement Data	III-3
Travel Data by Vehicle Type.....	III-3
Temporal Distribution of Travel Activity by Vehicle Type.....	III-6
U.S. Territory Information.....	III-10
IV Universe and Sample Data Requirements	IV-1
Universe Data.....	IV-1
Standard Sample Data	IV-1
Donut Area Sample Data.....	IV-1
Coding Nonuniform Roadways	IV-1
Structure Treatment.....	IV-2
General Reporting Requirements	IV-3
Data Item Summary Table.....	IV-3
General Coding Instructions.....	IV-6
Data Coding Instructions.....	IV-7
V Linear Referencing System Requirements	V-1
General LRS Rules.....	V-2
Summary of LRS Data Requirements	V-10
Node Data File Coding Instructions	V-12
Data Item Details.....	V-13
Inventory Route Link Data File Coding Instructions.....	V-16
Data Item Details.....	V-17
VI Updating HPMS Data	VI-1
Introduction	VI-1
General	VI-1
Updating Universe and Sample Data	VI-1
Updating Summary Data	VI-4
Updating LRS Data	VI-4
VII Sample Selection and Maintenance	VII-1
Introduction.....	VII-1
Sample Panel Considerations.....	VII-1
Sample Stratification and Precision Levels.....	VII-2
Preparation for Sample Selection.....	VII-3
Calculation of Expansion Factors	VII-4
Sampling Rural and Small Urban Areas	VII-4
Sampling Individual Urbanized Areas	VII-4
Sampling Collective Urbanized Areas	VII-5
Sample Maintenance.....	VII-5

Appendices

A	Table of Federal Information Processing Standard (FIPS) Codes for States	A-1
B	Urbanized Area Codes.....	B-1
C	Volume Groups and Precision Levels	C-1
D	Sample Size Estimation Procedures	D-1
E	Measuring Pavement Roughness	E-1
	Introduction.....	E-1
	Equipment.....	E-1
	HPMS Roughness Measurement Procedure	E-2
	Additional Recommendations for Collection of Roughness Data.....	E-2
	Coordination with Other Activities	E-3
	AASHTO PP37-99, Standard Practice for Determining Roughness of Pavements	E-4
F	Traffic Monitoring Procedures for the HPMS	F-1
	Introduction.....	F-1
	General.....	F-1
	Volume Group Assignments.....	F-2
	Traffic Monitoring Guide	F-2
	Application of Traffic Count Procedures to HPMS	F-3
G	Reporting Travel Data in Air Quality Nonattainment Areas	G-1
	Introduction.....	G-1
	NAAQS Nonattainment Area Codes	G-2
	Donut Area Sampling Procedures.....	G-3
	General.....	G-3
	Donut Area Boundary	G-4
	Standard Sample Review	G-4
	Donut Area Sampling Universe	G-4
	Donut Area Universe Stratification.....	G-5
	Preparing the Donut Area Universe Sampling Frame	G-5
	Precision Level Specification.....	G-6
	Donut Area Sample Selection Process	G-6
	General.....	G-6
	Determining Stratum Variability.....	G-6
	Determining Stratum Sample Size	G-7
	Random Sample Selection Process	G-7
	Judging the Validity of the Sample	G-8
	Computation of Donut Expansion Factors	G-8
	Estimating Total Travel in the Donut Area	G-9
	Maintaining the Sample	G-9
H	LRS Data File Template Procedures	H-1
	General Guidelines	H-1
	Specific Options.....	H-1
I	Climate Zone Definitions	I-1
J	Description of HPMS Submittal Software.....	J-1
K	Sample Adequacy Assessment Software	K-1
L	Metric/English Conversion Procedures	L-1
	Introduction.....	L-1
	Hard Conversion	L-1
	Soft Conversion	L-2
M	Procedures for Estimating Weighted Design Speed	M-1
N	Procedures for Estimating Highway Capacity	N-1

Tables

I-1	Sources of Selected HPMS Data	I-2
I-2	HPMS Data Used for Apportionment.....	I-3
IV-1	Universe Data Summary.....	IV-4
IV-2	Sample Data Summary	IV-5
IV-3	Roughness Reporting Requirements	IV-20
IV-4	Pavement Condition Rating	IV-21
IV-5	Coding Guide for Curves & Grade by Class.....	IV-29
C-1	Standard Sample Volume Groups and Precision Levels (Rural Areas)	C-1
C-2	Standard Sample Volume Groups and Precision Levels (Small Urban Areas).....	C-1
C-3	Standard Sample Volume Groups and Precision Levels (For Urbanized Areas <200,000 Population that are NOT in NAAQS Nonattainment Areas).....	C-2
C-4	Standard Sample Volume Groups and Precision Levels (For Urbanized Areas \geq 200,000 Population and Smaller Urbanized Areas that ARE in NAAQS Nonattainment Areas)	C-3
C-5	Donut Area Sample Volume Groups and Precision Levels	C-3
L-1	Hard Conversion for Speed (English to Metric)	L-3
L-2	Hard Conversion for Speed (Metric to English)	L-4
L-3	Hard Conversion for Length (English to Metric).....	L-5
L-4	Hard Conversion for Length (Metric to English).....	L-6

Figures

IV-1	Two-Way At-Grade Intersections	IV-17
IV-2	Freeway Tee Intersection	IV-17
IV-3	Number of Through Lanes.....	IV-19
IV-4	Lane Width	IV-24
IV-5	Median Measurement	IV-26
IV-6A	Shoulder Type/Width	IV-27
IV-6B	Shoulder Type/Width	IV-27
IV-6C	Shoulder Type/Width	IV-28
IV-7	Left Turn Bays.....	IV-34
IV-8	Exclusive Right Turn Lane	IV-35
IV-9	Count Items	IV-37
V-1	Duplicate Milepoint Equation.....	V-3
V-2	Re-Entering a County; Equation Created.....	V-4
V-3	Route Stops and Restarts at a Different Location; Milepoint Stays the Same.....	V-5
V-4	Nonduplicate Milepoint Equation.....	V-5
V-5	Re-Entering a County; No Duplicate Milepoints	V-6
V-6	Route that Stops and Restarts at Different Locations; Milepoint Increases	V-7
V-7	HPMS Section Near a Duplicate Milepoint Equation.....	V-8
V-8	HPMS Section Crossing a Duplicate Milepoint Equation	V-8
V-9	HPMS Section Crossing a Nonduplicate Milepoint Equation	V-9
V-10	An HPMS Section that Runs Through Overlapping Routes.....	V-9
V-11	Nodes and Political Boundaries.....	V-13
G-1	Houston NAAQS Nonattainment Area.....	G-3
M-1	Worksheet for Calculating Weighted Design Speed.....	M-3
